

Special Offer:

MarStand 815 MF + Millimess 1003

In combining the extra-stable MarStand 815 MF 3D measuring tripod with magnetic base and the Millimess 1003 mechanical dial comparator, you obtain reliable and μm -accurate measuring results for your precision manufacturing. For this purpose the MarStand 815 MF is equipped with a very precise fine adjustment and a switching magnet base. The compact and robust Millimess 1003 offers outstanding results with its high sensitivity. For length, flatness, concentricity and comparison measurements, it impresses with its unique accuracy and long-term precision.

Top features:

- High stability and rigidity due to extra-sturdy components for high-precision measurements in μm resolution
- Central clamping: fix and clamp all joints with one turn
- Maintenance-free mechanical clamping system
- **Millimess 1003:** High sensitivity and precision due to special measuring mechanism with ball-bearing mounted measuring pin
- **Millimess 1003:** Extremely robust and long-term precision due to shock-protected measuring mechanism
